

Kids Size Guide

Please print this guide at 100% by setting Page Scaling to 'none'

This line should measure 5cm

How to get the best fit

- ♥ Place the printed guide on a hard and even surface.
- ♥ Fold along the dotted line and place your child's foot against the fold.
- ♥ Choose the size above the longest toe.
- ♥ For best results your child should be in standing position so the foot is naturally spread.
- ♥ It is normal for one foot to be larger than the other. Please use the largest foot for the final size.
- ♥ If your child measures between two sizes, choose the larger size on the chart.
- ♥ If measuring for a school or sport shoe, get your child to wear socks during this process.

Some other questions to consider

Is this shoe for now or in a few months?
Does your child wear orthotics?
